

I am thrilled with the 'no-call' phone privacy law in Indiana. I am sure I was one of the first to sign up, and I am very pleased at the results. I feel like my family actually got our lives back after the law took effect.

Prior to the law, every evening between 5:30pm and as late as 10:00pm we received several phone calls from telemarketers. We would get as many as 15 calls a night and it was very disturbing. Please do NOT let this law go away. The law has made for many happy Hoosiers in the State of Indiana, and it must remain in tact.
